## WORK EXPERIENCE

---

### Dolby (Dolby.io)

*Software Engineer, Developer Programs*

**Aug. 2020 – Present**

*San Francisco, CA*

- Dolby.io is Dolby's developer platform that provides APIs for both media enhancement and communication
- As a Software Engineer in Developer Programs, I wear many hats to support the Developer Relations team:
  - Build web applications demonstrating use of Dolby.io's APIs, integrate third-party APIs, develop code to onboard developers
  - Develop internal tools and infrastructure using Node.js and Python, and AWS Services
  - Customize functionality of documentation using JavaScript, HTML and CSS
  - Enhance developer experience by integrating third party search API Algolia into documentation
  - Tech Stack: React, JavaScript, HTML, CSS, Node.js, Python
- Technical writing, including [blog](#) demonstrating how to build an authentication server using AWS
- Co-Lead of Dolby Indigineous Voices Elevated (D.I.V.E)

### LaneOne

*Software Engineer*

**April 2019 – May 2020**

*San Francisco, CA*

- Developed front-end and back-end features for both consumer-facing web application and internal CMS using Ruby, Ruby on Rails, JavaScript, PostgreSQL, HTML5, CSS and Bootstrap
- End to end ownership of features such as integrating a third-party API to allow users to purchase trip insurance
- Implemented test driven development (TDD) using Rspec

### The Relish Media Group

*Software Engineer Intern*

**Jan. 2019 – Feb. 2019**

*San Francisco, CA*

- Integrated D3 with React and Redux to create data visualizations showing number of new users

### Adda Clevenger School

*Music Teacher and Band Director*

**Aug. 2015 – May 2018**

*San Francisco, CA*

- Taught general music and band classes grades TK-8, developing a school band program from the ground up

## EDUCATION

---

### Rithm School

*Full Stack Developer Program*

**March, 2019**

*San Francisco, CA*

### Ithaca College

*Bachelor's of Music in Music Education*

**May, 2014**

*Ithaca, NY*
